Download

Gamers may have experienced this annoyance before, or they just want to play their games on a Windows PC without the need of a disc in the drive. This topic will cover the fixes you need to do to enable your games to work. If you are using the Official Game Fixers CD you can get it here. [url=""] It would be useful for people to note that to enable your game to work without the use of the official patch you must be running the Windows XP SP2, Windows Vista, Windows 7, or Windows 2008 Operating System. Some other versions of Windows do not have the necessary files on them to enable this functionality. I also would like to note that Games such as Fallout 1, 2, 3, Enclave 1, 2, Brotherhood of Steel, Warcraft 3, Lord of the Rings Online, and other small titles also will require these fixes. I have provided a very lengthy how-to that will take you through some steps on how to use this. If you are in need of some help with this please just post in the thread with help requests and I will help you out as best I can. Failing that, you might have to take the time to create a self extracting archive or use a program like PEiD, 7Zip, WinZip, or WinRAR. RACE - You must create a shortcut to the game on your desktop. Right click on the shortcut and choose 'properties' - 'compatibility' tab, here you will see a checkbox 'Run this program as an administrator'. Check the box and the game will run. If it is not already set to do this, right click the shortcut and click 'properties' and set the compatibility setting to 'run as administrator'. IMPORT - Select the "game.ini" file in the "My Documents\R.A.G.E.KINGS\game\game.ini" folder. If there is no such folder, create it using the 'New' button in File Explorer (CTRL+E). Then select the "game.ini" file and click 'Open'. To keep your games from being overwritten, save the "game.ini" file in your "My Documents\R.A.G.E.KINGS\82157476af
